Relevant Building Code Clauses:

B1 Structure

Statement on how the building product is expected to contribute to compliance:

To ensure compliance with the NZBC, products must be used in accordance with recommendations from suitably qualified and experienced designers familiar with a range of NZ Standards.

Winstone Aggregates have an in-house quality team who regularly review testing results to aid with material compliance to NZ standards. Testing results will be provided at the time of material purchase if requested. The placement, on site control, levels of vibration applied and suitability for use of the materials which are provided are the responsibility of others.

Limitations on the use of the building product:

Product conformance can only be guaranteed following provision of client product specification at time of order.

Design requirements that would support the use of the building product:

The product should be used based on direction from a suitably qualified and experienced individual.

Installation requirements:

No instruction on installation or placement of the sand/aggregate materials are provided by the supplier (Winstone Aggregates). The product should be placed and compacted by the purchaser to meet their required specification.

Maintenance Requirements:

N/A

Is the building product/building product line subject to warning or ban under section 26?: No

If yes, description of warning or ban under section 26: N/A

Date: 02 November 2023
