

# FILL REQUIREMENTS

We now require an offsite disposal report stating the suitability of the fill for Wheatsheaf Clean fill and how it meets requirements. These reports are commonly known as:

- Soil Disposal Certificates
- Waste Classification Reports
- Work Order or Instruction Plans
- Soil Management Plans

Information required in the reports to include:

- Volume and a description of the fill material.
- Details to show the 'source' of the material, including a site plan.
- An understanding of potential contaminant sources and contaminants of potential concern for the source material.
- Any sampling plans & results related to the source material.
- Details of sampling and justification for the sampling density used; and
- Details of the haulage contractor / persons responsible for tipping.
